

PRODUCT PROFILE

Zephyr 3 Rugged Antenna

NEW!

Features:

- ▶ Compact antenna designed for rugged applications
- ▶ Millimeter level phase center repeatability
- ▶ Robust low elevation tracking
- ▶ High signal gain for reliable tracking in difficult environments
- ▶ Improved out-of-band signal interference rejection
- ▶ Comprehensive GNSS support for current and near-future GNSS signals including MSS-Band, L1, L2 and L5 frequencies for GPS, GLN, GAL, BDS, IRNSS and QZSS
- ▶ Wide input voltage range
- ▶ Dynamic switching of MSS frequency configurations
- ▶ Quick release mast, 5/8" thread and 4-hole mounting options
